Omaha, NE	630 miles (I-80 E/W & I-29 N/S)
Chicago, IL	700 miles

ROSEAU COMMUNITY PROFILE:

Roseau, the County Seat for Roseau County, is the regional employment, shopping, medical, government and service center for the Lake of the Woods area of Minnesota.

Originally established as a farming community, Roseau and Roseau County, have transformed into a world-class manufacturing and research and development center for the recreational transportation equipment and window industries.

Roseau and Roseau County lie within the major growth corridor of Minnesota. This growth is closely linked to the vast recreational opportunities of the Lake of the Woods region and its healthy industrial base. This growth is projected to continue.

Not only is Roseau a growing and dynamic community, but it is also a low cost city in which to do business. The hard working, non-union, workforce make the cost of labor affordable. Taxes are low with high quality services. Energy costs in the Roseau area are kept low with a municipally controlled coal-fired power plant in North Dakota. The City also is served with backup power from hydroelectric sources in Canada.

The City of Roseau also provides all the basic infrastructure for today's cutting edge industry including high speed internet and data transmission, ITV capacity, business lodging and restaurants, transportation, and a wide range of business services.
